November 22, 2019 - All day

Yale: Imaging Mass Spectrometry and Omics Symposium Friday, November 22

The Department of Environmental Health Sciences at Yale School of Public Health is hosting the Yale Imaging Mass Spectrometry and Omics Symposium November 22 with eight keynote speakers.

The goal of this symposium is to provide opportunity to students and scholars to explore advances and challenges in analytical and computational tissue imaging mass spectrometry. The eight MSI technology scientists and expert speakers of this symposium will share their research on the application and the effects of modern Mass Spectrometry Imaging (MSI) technology in public health research and pharmaceutical industry.

Keynote speakers include:

Dr. Richard Caprioli, Professor of Biochemistry, Director of the Mass Spectrometry Research Center, Vanderbilt University School of Medicine.

Dr. Presha Rajbhandari, Post-Doctoral Research Scientist, Columbia University

Dr. Erik N.K. Creesman, Assistant Professor of Interventional Radiology, UT MD Anderson Cancer Center.

Dr. Vasilis Vasiliou, Professor & Chair, Dept. Environmental Health Sciences, Yale School of Public Health, Yale Cancer Center

Dr. Thomas Roddy, Sr. Director of Metabolism, Agios Pharmaceuticals

Dr. Caroline Johnson, Assistant Professor of Epidemiology, Yale School of Public Health,

Mr. Steve Martin, VP Research, Waters Inc.

Dr. Kirill Veselkov, Faculty of Medicine, Dept. of Metabolism, Digestion and Reproduction, Imperial College London

When: Friday, Nov. 22, 2019

Where: 60 College Street

Time: 8:30 a.m. to 5:00 p.m. Eastern
